upSTREAM
ADVENTURES IN SUMMER LEARNING

LORI COOK, CHILDHOOD EDUCATION COORDINATOR
JIM STASKOWSKI, MANAGER RICHLAND LIBRARY SANDHILLS

Going upSTREAM! **Adventures in Summer Learning**

Learn how one library location focused summer learning for children, tweens, teens and families to reduce the effects of summer slide through experiences in **S**cience, **T**echnology, **R**eading, **E**ngineering, **A**rt, and **M**ath – all with limited staff and funds.

- ★ Library as Learning Center
- ★ Partners: Inside and Outside the Library
- ★ STEAMy programs

A BRIEF INTRODUCTION TO SANDHILLS

Where we are | Who we serve

How that influenced us

1. Let's Build Relationships

Teachers: make it easy for them to access our resources

Media specialists: make it easy for outreach, joint ventures at the library

Principals: what do they need?

2. Find Concrete Ways to Offer Support

Professional Development: make sure teachers understand what we offer so they can share with students and parents

Outreach events: promote what we can do and share our commitment to be partners in education

School Improvement Counsel: be part of the conversation; be there when the ideas emerge; learn what schools are concerned about

3. Find Concrete Ways to Partner

R2S: what can we do to support the camps taking place near us?

RTI and Reading/Literacy Coaches: what do they wish families had access to during the summer?

Parent educators: attend parent workshops, allow a library visit to count towards parent contribution

Provide Out-of-School Experiences that combat the effects of Summer Slide

What we Decided:

I. Invite Summer School Players to make regular library visits (not exact intended audience – RTI/R2S students – but confident there was overlap)

II. Commit to becoming a Library as Learning Center (self-guided learning for all ages)

Provide Print Reading and Parenting Resources with a focus on reading activities created with input from literacy coach

Provide Self-Guided Learning Opportunities including Look & Learn Scavenger Hunts, Learning Stations with Guide, Games/Learning Toys

III. Create upSTREAM: All programs related and labelled as STREAM

IV. Promote through Outreach: commit the staffing and time to see as many as schools as possible

NORTHSPRINGS SUMMER PLAYERS

**WHAT WE LEARNED:
NOT OUR SPECIFIC INTENDED AUDIENCE
BUT CONFIDENT WE HAD OVERLAP
SHOWED WE CARED; WILLING TO HELP**

I. WE COMMITTED TO HAVING OUR NEIGHBORING SCHOOL VISIT WEEKLY

60-100 1st-5th grade students; 10-1130am on Thursdays; 6 times

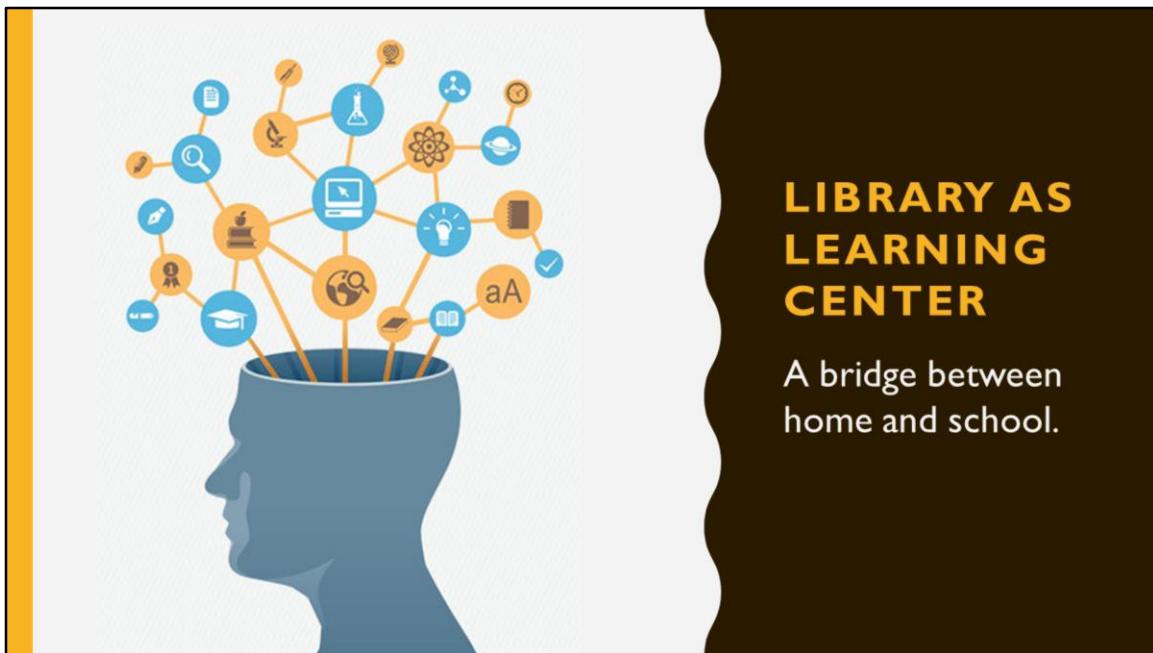

Sent outreach cards home with students

Waived fines

If we couldn't check-out anything to a student, found weeded books to send with students to return on next visit

Provided an activity or experience in addition to storytime

At the end of the summer, conducted an Awards program with medals, Pomp & Circumstance, prizes to take home

LIBRARY AS LEARNING CENTER

A bridge between home and school.

II. WE COMMITTED TO THE IDEA OF LIBRARY AS LEARNING CENTER

It's Who We Are! Considering where we are and who are customers are and where we are headed, this is not such a stretch.

It's a Little Bit of Everything! Books play a critical role in supporting learning; reading is a most effective learning activity – especially during the summer. However, because everyone learns differently, the library can offer additional pathways to the construction and consumption of learning.

We're already doing it! Libraries have always been involved in learning – from scrolls to eReaders, from storytime to Makerspaces – it's always been about learning. Our commitment was just to intentionally expand our efforts and build a framework, BRAND it, put a name on it, educate customers about it.

We have to! The students of tomorrow need more – more opportunities to learn, different learning environments, high-quality out-of-school experiences, access to more, creative and fun learning.

21ST CENTURY GRADUATE

Financially Literate
Literate Consumer of Media
Curious Researcher
Innovative Thinker
Proficient Reader
Self-directed Worker
Capable Technology User
Relationship Builder
Knowledgeable Global Citizen
Life-long Learner
Health-focused
Multi-lingual

From www.SCcompetes.or/TransformSC

South Carolina's graduation rates have risen from 60% to 77.5%.

1 in 4 South Carolina Students fail to graduate.

41% of graduates entering technical colleges require remediation.

Profile of the South Carolina Graduate

World Class Knowledge

- Rigorous standards in language arts and math for career and college readiness
- Multiple languages, science, technology, engineering, mathematics (STEM), arts and social sciences

World Class Skills

- Creativity and innovation
- Critical thinking and problem solving
- Collaboration and teamwork
- Communication, information, media and technology

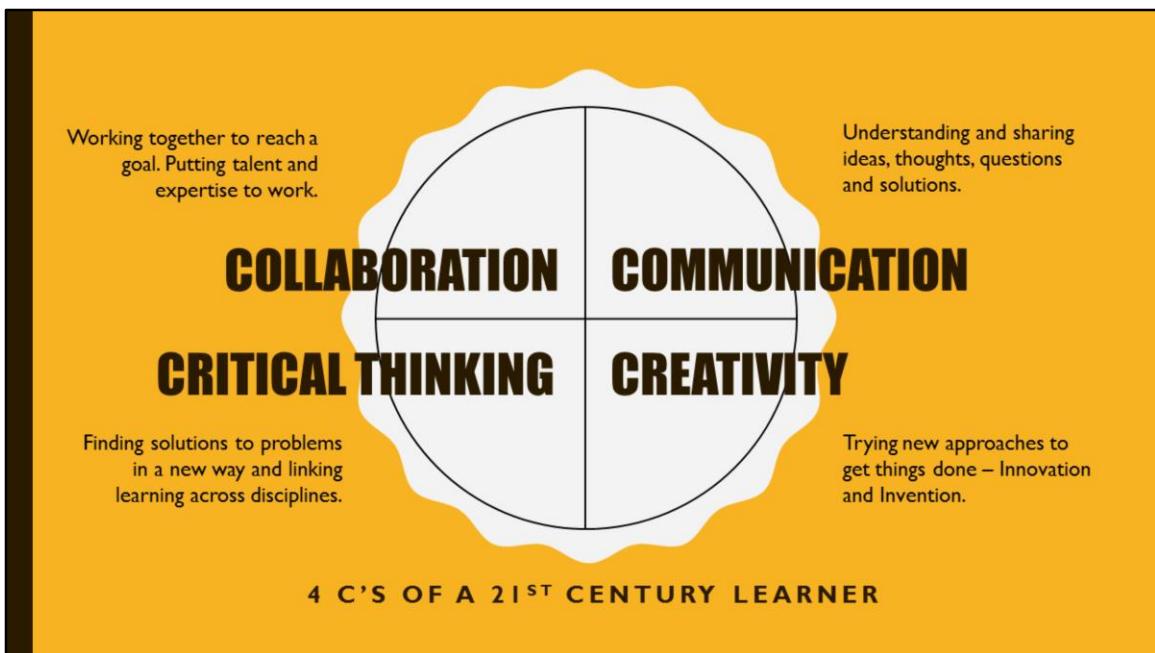

- Knowing how to learn

Life and Career Characteristics

- Integrity
- Self-direction
- Global perspective
- Perseverance
- Work ethic
- Interpersonal skills

The New Learning Model

- Personalized** – match to the student, not one size fits all.
- Teacher as facilitator, not lecturer** - Students are held accountable for their own learning.
- Pace to the Individual Student** – Students progress after mastering concepts.
- Technology enabled** – Anytime, anywhere learning with technology integrated into the curriculum.
- Evidence based** – new testing system that provides real-time, useful information to aid learning.
- Effective partnerships** with parents, families and communities.

21st Century Skills are a set of academic building blocks—abilities and ways of thinking—that can help kids thrive as 21st century citizens.

From Valerie Gross:

What are libraries in this movement doing differently? They are repositioning themselves as educational institutions, just as important as schools, colleges, and universities. As a result, their inherent value is no longer questioned. No one looks at them anymore with a puzzled expression, asking, “Tell me again what you do?” Instead, the library systems enjoy *heightened respect* in their communities and *optimal funding*.

We deliver high-quality public education for all through a curriculum that comprises three pillars: Self-Directed Education, Research Assistance & Instruction, and Instructive & Enlightening Experiences.

We design and deliver a world-class curriculum for the benefit of everyone our diverse community.

We are a vital educational institution.

We are partners in education.

We are education.

We deliver equal opportunity in education.

We deliver high-quality public education for all ages.

We provide equal access to world-class education for all.

Line of work? Education.

Self-Directed Education through vast collections of items in print, audio and electronic formats; and thousands of specialized online research tools (e.g., *Wall Street Journal* and *Access Science*).

Research Assistance & Instruction for individuals and groups. This pillar includes classes, seminars and workshops for all ages, taught by library instructors.

Instructive & Enlightening Experiences through cultural and community center concepts, events, and partnerships.

"Libraries = Education means asserting the role of libraries as key components of the educational enterprise. For public libraries, it means we are educational institutions in our own right, on an equal footing with K-12 schools, colleges, and universities. We're central to success for students, faculty, and staff. [We realize this vision with a 3-pronged approach]

The first prong is to position the staff as a team of educators who see themselves as delivering a curriculum.

The second prong is positioning everything we do under **three pillars of education**:

The first pillar is "**self-directed education**." Everything we do to provide access to knowledge is supporting self-directed education.

The second pillar is "**research assistance and instruction**." It's delivering personalized research guidance and delivering classes, seminars, and workshops.

The third pillar is "**instructive and enlightening experiences**." It means building community and partnerships—bringing people together for education and discussion.

The last prong is subscribing to strong, **powerful language** that speaks for itself. It's trading our traditional words with a new, intuitive vocabulary that you don't have to explain.

Changing the language only works when you have the extraordinary services to back up your words. You have to be effective and accountable and efficient—your words have to be credible. You have to convey that the library is a wise investment. For example (using traditional language for a moment), if a "children's librarian" is "doing a storytime," it addresses important developmental goals. Changing the language is easy because the performance is already in place. If it's just a subpar story, then calling the librarian an "instructor" and the event a "children's class" isn't going to work. But many good public libraries are already offering extraordinary children's

classes, and all they have to do is use the appropriate language so that they get credit for it."

GOING
upSTREAM
ADVENTURES IN SUMMER LEARNING

III. WE COMMITTED TO THE CONCEPT OF UPSTREAM

In response to teachers and parents, we tried something new this summer. Everything we did for students age 0-18+ encouraged learning, creating, and sharing with experiences in STREAM. And, we didn't just DO the programs, we BRANDED, PROMOTED, and FULLY IMMERSED our staff, building, storytimes in this idea.

Why upSTREAM? Think of a canoe in a river. If you're not rowing upSTREAM towards your goal (a successful school year; learning to read; strengthening math skills, etc.), the current will cause you to drift farther and farther from achieving success. We want to assist students and families to go upSTREAM! Think of the library as the bridge between home and school!

Learning Centers: On the end of most end caps, we created learning activities for young to older children including colors, numbers, life cycles, and geometry.

Look & Learn Scavenger Hunts: We provided 4 scavenger hunts to encourage letter and number recognition, life cycle of butterflies, and zoo animals. The scavenger hunt

lists included information, learning at home suggestions and book recommendations for these subjects.

Reading Station: We provided reading recommendations and literacy activities to encourage basic reading skills such as comprehension as well as math and writing activities and/or resources.

Parent Resources: We provided information on legal, health, literacy and emergency services, how to reduce the effects of Summer Slide, and other important material for encouraging health and STREAM at home.

Branded Programs: Every program had one or more indicators that identified the program as STREAM or 4Cs.

Summer Learning Station: We created an easily identifiable themed table for families to sign-up for the Summer Learning Challenge and receive awards as well as to pick up Look & Learns, Learning Center Guides, and Event Flyers. We committed to scheduling someone there at all times. This staff member also helped maintain displays, learning centers, parent and reading resources

Lesson Plans and Handouts for some Programs/Storytimes: To ensure we were providing quality out-of-school experiences, we developed lesson plans or half-sheet handouts for many of programs that described how to complete a certain activity or support that activity at home. This helped focus staff planning the programs as well as provide a take-home to extend the experience from the library into the home.

The image shows the front cover of the Richland Library's Summer 2016 brochure. The title "Children Tweens Teens & Families Summer 2016" is at the top. Below it is a large graphic of a fish swimming upwards through water bubbles, with the text "Let's Go STREAM and Avoid the Summer Slide with science technology reading engineering art math". A quote from the National Summer Learning Association (NSLA) follows: "All young people experience learning losses when they do not engage in educational activities during the summer." Below this is a section titled "Get the Facts about Summer Slide: Look to the Sandhills Summer Side Paged". The brochure is filled with various program descriptions, including "GUEST PERFORMANCES", "FOR FAMILIES", "FOR SCHOOL AGE CHILDREN", and "FOR TEENS". It also features a "4C" logo representing Creativity, Communication, Collaboration, and Critical Thinking. The bottom of the page has a decorative wavy pattern and the text "Richland Library | Sandhills".

Outreach...Connect with Schools!

Plan and Commit

Make it Easy

Good for Students

Good for Staff

IV. WE COMMITTED TO AN OUTREACH PLAN

Plan and Commit:

Changed our priorities: phone, bookdrop,

Allowed for sacrifices: short-staff, stretched schedule, said no to other events

Used Volunteers to Free Up Staff: holds, bookdrop, or shelving

We Made it Easy for Schools:

Created Google Doc with Table

Sent an Invitation

Allowed Schools to Availability

4 Options:

Morning Show

3 Hours in Morning

3 Hours in Afternoon

Evening Event

Visits Could Include

Class Visits (either us to them or them to us in the library)

Promote upSTREAM

Promote Summer Learning Challenge Prizes
Tell a Story, Song, or Joke

Good for Students

Quality content (stories, awards, enthusiasm)

Recognize staff when visit the library

Good for Staff

Trained how to do it well – professional development

Become better library ambassadors

Enjoy being recognized by customers/students/families in and out of the library

Increases understanding of partnership with schools to support education

Creates Staff Engagement and Buy-In

Outreach Opportunities						
Richland Library Sandhills / Summer Learning Challenge						
	MONDAY May 23	TUESDAY May 24	WEDNESDAY May 25	THURSDAY May 26	FRIDAY May 27

3-6pm	CLOSED	Bridgewater KELSEY/TANEAL	St. John Neumann LORI/GERT			
						OVER 6300!

Outreach...Results!

Anecdotal

2015

Visited 9 Schools

First 2 days: 125

First full week + first 2 days: 500

2016

Visited 17 Schools | 6300+ students

First 4 days: 675

First full week +first 4 days: 1650

Anecdotal evidence of effectiveness: people coming into library who recognize staff, share the stories or jokes they heard, say they came to sign-up for the Summer Learning Challenge. Staff felt more equipped to answer questions and support students.

LOOK & LEARN

RICHLAND LIBRARY | SANDHILL

ABC's Scavenger Hunt

Look for all of the letters of the alphabet in the children's area! Cross them off as you find them. Ask a staff member for a sticker when you have found them all!

Keep this "Look & Learn" bookmark for ways to encourage alphabet recognition!

Letter Recognition refers to the ability

- * to visually recognize letters of the alphabet
- * to name each letter
- * to match that letter name to its written form – both upper and lower case
- * to distinguish between similar looking letters.

Letter identification is a foundational reading skill and the best predictor of eventual reading success. It is best taught with a balance of formal and informal teaching. This "Look & Learn" has suggestions for making letter recognition a fun part of everyday life!

For more early literacy activities, check out our "Learning Centers" at the end of the book or come and see us at the desk.

Let's Go STREAM
at Richland Library Sandhill

Try these activities daily to encourage Counting and Number Recognition

Sing Songs and Rhymes with Numbers: 5 Little Duck Went Out to Play, 5 Little Monkeys Jumping on the Bed, 10 in the Bed, and 12 Buckle Your Shoe, make learning number names fun for little ones!

123 Games: Ask questions that require counting as you run around the house like "How many chairs at the table?" or "How many shoes in the basket?"

123 Crafts: Make or print out 11 lady bugs. Label them 0-10, glue on black spots (or, even yummier, use chocolate chips) for a corresponding number.

LEGO 123: Create a set of 123 numbered boxes. Have your little one put the corresponding number of blocks to communicate the difference between each figure. Or, have them count as they build up.

Everyday Numbers: Identify numbers in the workplace – books, signs, etc. – call out their name and count to that number. Count items as you put them in your cart at the grocery store. Count everything you see on a walk – 1 dog, 2 cars, 7 apples, etc. Label items in your house – a 2 on a pair of shoes or a 12 on a dozen of eggs.

READ SING TALK PLAY WRITE every day!

123 Book Recommendations

- 1-2-3 Peas or Big Fat Hen by Keith Baker
- Ten, Nine, Eight by Bill Martin Jr.
- Ten Black Dots by Donald Crews
- Robot A Noisy Counting Book by Pamela D Edwards
- Let's Count Goats by Mem Fox
- Counting in the Garden by Patrick Hruby
- Hopping Kisses by Karen Katz
- One, Two, Three, See How We Grow! by Bill Martin Jr.
- Subtraction Crossing by K.C. Olson
- Fish Two Fish Red Fish Blue Fish by Dr. Seuss

Parenting Resources

Developing Skills through Sensory Play

RICHLANDLIBRARY.COM

Reading!

What is the name of the cereal?
What company makes the cereal?
What are the first 2 ingredients in the cereal?
Write the alphabet on a piece of paper and try to find a word on the cereal box that starts with each letter in the alphabet.

Math!

Find a number on the box. Find all the numbers 0, 1, 2, 3, 4, 5, 6, 7, 8, 9.
Measure the box. What's the length, width, area, volume?
4 grams of sugar = 1 teaspoon. How much sugar is in a serving of cereal?

Writing!

Describe your favorite cereal now: does it taste, smell, look, feel and sound like your favorite?
Write a letter to your parent and convince them to buy this cereal.

17

Learn Together

at RICHLAND LIBRARY | SANDHILLS

Look & Learn Scavenger Hunts

Each Look & Learn has additional activities and book recommendations so you can continue at home to reinforce what you've learned here at the library! Find the lists at the Summer Learning Station!

Zoo Animals | ABCs | Butterflies | 123s

Learning Centers

Learning manipulatives & activities on a variety of subjects can be enjoyed at the end of each bookshelf.

ABCs | 123s | Fractions | Life Cycles | Weather
Tangrams | Counting | Shapes & Colors

Reading Resources Table

Look here for tips, activities, & resources to encourage daily reading & learning and let's avoid the summer slide

Here are some suggested activities for each Learning Center!

Letter Recognition

As your little one plays with magnetic foam letters, consider some fun ideas to reinforce letter recognition and phonemic awareness. Check out our Parent Resources for more tips for encouraging and fostering a love of reading:

- * Play a game of "Match the Letter." Can you find two that are alike? Can you match the upper case to the lower case?
- * Talk about the sounds letters make.
- * Can you spell any small words?

Number Recognition

As your little one plays with magnetic foam numbers, try these fun ideas to reinforce number recognition and counting. Check out our Parent Resources for more tips on encouraging math skills:

- * Put the names of the numbers in order.
- * Clip for the value of each number.
- * Can you make any math equations with the numbers present?

Fractions

Experience simple fractions visually with these magnetic fraction wheels and bars. Check out our upSTREAM programs this summer for more Math Fun!

- * Find equivalent fractions? Which fractions add up to 1 whole event?
- * Can you name the fractions? Whole, Halves, Thirds, Fourths
- Who's more, one fourth or one third?
- Let's say we're having pizza for dinner but then friends show up to eat. If one person is having equal slices of one whole pizza, what part of the whole pizza will 2 people eat? 3

Ice Cream Counting

Each magnetic cone has a number written on it and a corresponding ice cream scoop with the same amount of sprinkles. Help your little ones match the number with its correct amount of sprinkles by counting the number of objects and then touching them to the cones.

- * One-to-One Correspondence is the matching up of a verbal or written number with an object. When a child has mastered one-to-one correspondence, she will be able to touch objects as he counts them.

Shapes & Colors

Learning that shapes have names is a building block to recognizing that colors have names and counts! Learning our shapes and colors is fundamental for kindergarten success!

- * Say the names of the shapes
- * Sort by shape
- * Sort by color
- * Point to the sides of each shape and count

What's the Weather?

Please assist your little ones as you observe and identify the weather at this "What's the Weather?" Learning Center.

- * Ask questions: What's the weather today? How does it feel outside? Is it hot or cold? What can you see in the sky? Do we need a coat? Can we do the same things when it rains?
- * Talk about what clothes to wear in certain types of weather (shorts, umbrella, coat, etc.)
- * Use accurate and detailed weather vocabulary provided.
- * Sing songs and rhymes about weather like "Rain, Rain, Go Away" and "Very Itchy Spider".
- * Download a weather app and investigate radar

18

Let's MAKE... I Spy Sensory Bags

Supplies Needed:

- 2 Quart Size Zipper Bags
- 1 Cup Rice
- Masking Tape, Duct or Washi Tape
- Small items to Spy: buttons, blocks, magnet letters, gems, puzzle pieces, beads, coins, etc.

Step 1 Begin by putting your 8-12 items into the bag. Take a "group photo" to use as a guide for finding items. Point it out and attach it to the finished I Spy Bag.

Step 2 Put one cup of rice in zipper bag (add more if needed) and add trinkets.

Step 3 Seal bag one being sure to press out air. Fold rouged edge over and tape. Slip bag into bag two so that the sealed ends are on opposite sides. Use wash, duct, or masking tape to decorate the edges of the bag and to add extra strength if desired.

Let's Move!

Practicing Large Motor Skills may help your little one to burn off excess energy, increase focus, build social skills, cooperate with others, learn to take turns, and share.

Let's Make!

Use Masking Tape on the floor to create lines and patterns for your child to follow. Try these different activities as they move across the lines:

- Walk/Balance across the line on their heel
- Walk on the line toe to heel (or tap toe)
- Walk on the line backwards
- Alternate hopping on one foot
- Walk on one foot
- Try to balance an egg shaker or a sponge while walking the line
- Jump from short line to short line
- Jump backwards
- Play Follow the Leader

Richland Library | Sandhills

family SCIENCE storytime
RICHLAND LIBRARY | SANDHILLS

AUGUST

Science Workout of the Day

Rocket Science

Straw | Large Straw | Rocket Template | Crayon | Tape

Todays experiment is a fun, safe and simple way to explore air pressure as a means to launch a rocket or, as your child may say, "the rocket goes farther when I blow harder into the straw!"

- Color the rocket & cut out
- Attach the large straw to the bottom of the rocket
- With tape make sure the sealed end is at the front of the rocket
- Skip the small straw into the larger straw and you're ready to launch! Just give your straw a big puff of air!

PRESCHOOL SKILLS: Using colors and attaching tape help develop fine motor skills; Blowing improves oral muscle control—an important skill for self-cleaning and speech development.

VOCABULARY: Talk about what's happening using words like thrust, lift, angle, force, drag, speed, rocket, launch

LET'S EXPERIMENT: How does the angle you launch your rocket affect the distance it travels? How does air impact lift, lift, and weight? Can you design and engineer different types of rockets using the large/small straw options?
